Re: Asbestos Management Plan Update Notification

To Whom It May Concern:

As required by the Asbestos Hazard Emergency Response Act (AHERA,) the school district has maintained a Management Plan including Periodic Surveillance as stipulated in the Environmental Protection Agency's AHERA Regulations, Section 763.84. Re-inspection of our buildings is a regular part of our continuing asbestos Management Plan.

In addition to this formal surveillance, all of our regular custodial and maintenance personnel have been trained to continuously observe the asbestos-containing materials in our facilities and report anything unusual that pertains to those materials immediately to the Asbestos Program Manager for follow up. This is all a part of our continuing effort to maintain a safe environment for all our occupants and staff.

Our formal Asbestos Management Plan is available for inspection by any interested individual by appointment made through the Asbestos Program Manager's office at least one working day in advance. Because of the importance we attach to the Management Plan and its extent and complexity, a staff person familiar with the plan should be present to guide your examination of the plan in our offices.

If you wish a copy of the Management Plan, a copy will be furnished within thirty days of receipt of a written request at the cost of reproduction, total cost to be paid in advance. Since the plan is extensive and is continuously growing, but is divided into building specific sections, please be sure to request only those parts of the Management Plan that you need. The Asbestos Program Manager's office will be happy to assist you in this matter.

Sincerely,

Gavin Scalyer
Director of Food Service
And Building and Grounds
